

Using this Documentation

This section describes the features of Software AG documentation that make it easy for you to **navigate** to the page you need, to **search** for keywords, and to **print out** relevant parts.

Navigating through the Documentation

Navigation Bar

In the top right-hand corner of each page you will find a navigation bar that helps you to navigate through the documentation. The navigation bar contains some or all of the following links:

Choosing **PREV** on the first page of a documentation module takes you up one level in the documentation hierarchy.

Choosing **NEXT** on the last page of a documentation module takes you back to the first page of the same module.

Navigator Facility

The navigator facility is a Java applet that displays a collapsible/expandable, hierarchical tree view of the documentation, which helps you find your way through the documentation web. You can select in the tree view the document that interests you, then either choose the document title or choose Display page.

If you have been navigating in the documentation web, you can refresh the Tree Navigator display by choosing **CONTENTS** in the navigation bar. This will highlight your current location in the web.

Searching this Documentation

Use the link **SEARCH** from the navigation bar to open the Full Text Search page.

The Full Text Search software is supplied by PHD Computer Consultants Ltd.

You can get brief hints about using the Spy-CD Full Text Search by choosing the **Help** button on the Full Text Search page. For details of all the features of the full text search software, choose the link 'Spy-CD user instructions'.

Printing this Documentation

This user documentation is also available in Adobe PDF (Portable Document Format) for convenient, high-quality printing. The Adobe Acrobat Reader (or the full version of Adobe Acrobat) must be installed on your computer if

you wish to use the PDF files. If it is not already installed, you can download it by choosing:

Choose **PDF PAGE** in the navigation bar at the top of a page to open the corresponding PDF file in the Adobe Acrobat Reader.

If you choose **PDF BOOK** in the navigation bar at the top of a page, a list of available PDF books will be displayed. A PDF book contains the entire contents of the current documentation module, including a title page and a table of contents -- just like a regular book. Choose the required link to start the Adobe Acrobat Reader and open the corresponding PDF book. You can print either the entire book or just selected pages as required.
